GENERAL STATEMENT

Georgetown University consists of the COLLEGE, the SCHOOL OF MEDICINE, the SCHOOL OF LAW and the SCHOOL OF DENTAL SURGERY. The College, however, comprises in itself three distinct departments, viz: The Graduate School, the Undergraduate School, and the Observatories. Each School or Department is under the direction of its own Dean, and each Faculty has the power of legislating on its own affairs, but this power can be exercised only in subordination to the President and Directors of the University, and subject to their approval.

HISTORY.

The foundation of Georgetown College was projected as early as the year 1785, when the Rev. John Carroll, afterwards the first Archbishop of Baltimore, formed the plan and proposed it to his associates.

On November 13, 1786, the Corporation of Roman Catholic Clergymen, in the Chapter held at Whitmarsh, Md., adopted a series of "Resolves Concerning the Institution of a School," in which it ordered that a School should be erected at Georgetown, Md., and directed the sale of a piece of land belonging to the corporation, in order that the proceeds might be applied to the erection of the first building. Rev. Messrs. John Carroll, James Pellenz, Robert Molyneux, John Ashton, and Leonard Neale were appointed Directors.

Shortly afterwards an appeal was issued, entitled "Proposals to Establish an Academy at Georgetown, Potowmack River, Maryland." In this circular it was stated that "Agreeably to the liberal Principle of our Constitution, the Seminary will be open to students of Every Religious Profession." In 1788 the erection of the first building was undertaken; yet 1789 is commonly considered the year of the foundation of the College, as the deed of the original piece of ground was dated January 23rd in that year. Students were not received before 1791. Upon the reorganization of the Society of Jesus in Maryland, in 1805, the Georgetown College, as it had already begun to be called, was transferred to the fathers of that Society, under whose control and direction the University still remains.

An act of Congress, dated March 1, 1815, reads as follows:

“AN ACT

“CONCERNING THE COLLEGE OF GEORGETOWN IN THE DISTRICT OF COLUMBIA:

“Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That it shall and may be lawful for such persons as now are, or from time to time may be, the President and Directors of the College of Georgetown, within the District of Columbia, to admit any of the students belonging to said College, or other persons meriting academical honors, to any degree in the faculties, arts, sciences, and liberal professions, to which persons are usually admitted in other Colleges or Universities of the United States; and to issue in an appropriate form the diplomas or certificates which may be requisite to testify to the admission to such degree.

“LANGDON CHEEVES,

“Speaker of the House of Representatives.

“JOHN GAILLARD,

“President pro tempore of the Senate.

“Approved March 1, 1815.

“JAMES MADISON.”

Two years later the power of granting degrees, thus acquired, was first exercised.

On March 30, 1833, the Holy See empowered Georgetown College to confer, in its name, degrees in Philosophy and Theology.

The next step in the development of the College was the erection and equipment of a complete Astronomical Observatory in 1842; and in the following year the formal incorporation of the institution was effected by Congress in the following act:

“AN ACT

“To Incorporate Georgetown College, in the District of Columbia:

‘Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there be erected in Georgetown, in the District of Columbia, a college for the instruction of youth in the liberal arts and sciences, the name, style, and title of which shall be, ‘The President and Directors of Georgetown College.’

“SEC. 2. And be it enacted, That James Ryder, Thomas Lilly, Samuel Barber, James Curley, and Anthony Rey, be, and they are hereby declared to be, a body politic and corporate with perpetual succession in deed or in law to all intents and purposes whatsoever, by name, style and title of ‘The President and Directors of Georgetown College,’ by which name and title they and their successors shall be competent, at law and in equity, to take to themselves and their successors, for the use of said College, any estate whatsoever, in any messuage, lands, tenements, hereditaments, goods, chattels, moneys and other effects, by gifts, bequests, devise, grant, donations, bargain, sale, conveyance, assurance, or will; and the same to grant, bargain, sell, transfer assign, convey, assure, devise, declare to use and farm, let, and to place out on interest for the use of said college, in

such manner as to them, or a majority of them, shall be deemed most beneficial to said institution; and to receive the same, their rents, issues and profits, income and interest, and to apply the same for the proper use and benefit of the said College; and by the same name to sue and be sued, to implead, be impleaded in any courts of law and equity in all manner of suits, actions, and proceedings whatsoever, and generally by and in the same name to do and transact all and every business touching or concerning the premises, Provided, That the same do not exceed the value of \$50,000 net annual income, over and above and exclusive of the receipts for the education and support of the students of said College.

"SEC. 3. And be it further enacted, That the said corporation shall adopt a common seal, under and by which all deeds, diplomas and acts of said college or corporation shall pass and be authenticated, and the same seal, at their pleasure to break and alter, or devise a new one.

"SEC. 4. And be it further enacted, That no misnomer of the said corporation shall defeat or annul any donation, gift, grant, devise or bequest to or from the said corporation.

SEC. 5. And be it further enacted, That the said corporation shall not employ its fund or income, or any part thereof, in banking operations, or for any purpose or object other than those expressed in the first section of this Act; and that nothing in this Act contained shall be so construed as to prevent Congress from altering, amending, or repealing the same.

"J. W. JONES,

"Speaker of the House of Representatives.

"WILLIE P. MAGNUM,

"President pro tempore of the Senate.

"Approved June 10, 1844.

"JOHN TYLER.

"I certify that the above is a true copy from the original act in this department.

"Department of State, November 22, 1844.

"J. C. CALHOUN, Secretary.

The School of Medicine was opened in 1851, and the School of Law in 1870. The Graduate School was in existence as early as 1856, in which year it comprised four resident graduates. The University Hospital was opened in 1898, and the training school for nurses in 1903. In 1901 the first session of the Dental School was held. In 1909 the Seismic Station was erected.

LOCATION AND EXTRINSIC ADVANTAGES.

In its location at the Capital of the nation, Georgetown University enjoys advantages which can hardly be overestimated and which must necessarily increase with the growth of the country. Not only is the city, free as it is from noise, dirt and distracting surroundings of a great commercial center, most favorable to the tranquil and earnest pursuit of study, but it has an unparalleled

educational equipment in the great scientific collections and libraries of the Government. By the authority of Congress all such facilities for research and illustration in the Governmental collections are made accessible to the scientific investigators and students of institutions of higher learning in the District of Columbia.

This provision applies to the Library of Congress the National Museum, the Patent Office, the Bureau of Education, the Bureau of Ethnology, the Army Medical Museum, the Department of Agriculture, the Fish Commission, the Botanical Gardens, the Coast and Geodetic Survey, the Geological Survey, the Naval Observatory, several hospitals and other departments supplied with special libraries, laboratories and equipment for research. The administration of these bureaus brings together a large corps of scientific workers, and has already made Washington the great scientific as well as political center of the country. One consequence of these conditions is that the scientific societies are numerous and flourishing. Even the presence of the National Government, with its executive, legislative and judicial machinery, is a most powerful agent of education; to be familiar as a matter of daily observation with the workings of the House of Representatives, the Senate, the Supreme Court and the Administration is a privilege and a training which cannot be found elsewhere.

Of all these extrinsic facilities, the various Faculties of Georgetown University make full use, and among her instructors are found not a few of the eminent scholars and scientific men employed in the technical service of the Government. Her students meet with a cordial reception and careful assistance in their work in the various libraries, museums and scientific bureaus.

To the advantages enumerated above is added the atmosphere of study and research engendered by the presence of the many universities of which Washington is rapidly becoming the seat.

NEEDS OF THE UNIVERSITY.

The ordinary source of income for the University is the fees of the students. During her history she has received donations greater or less in amount, but with all these her present equipment of buildings and educational apparatus has been acquired only by incurring a considerable debt. Even this much could not have been effected, had not the President and Directors, as well as the other Fathers, the Scholastics, and Lay Brothers of the Society of Jesus, given their services to the University without compensation.

The most pressing need of the University is a fund for the much desired removal of the Preparatory School to a place separated from the College.

All bequests should be made to the "President and Directors of Georgetown College in the District of Columbia."
